

December 2022

TO WHOM IT MAY CONCERN:

All fire protection systems within the cities of Covington, Kent, Maple Valley, and SeaTac are required by the International Fire Code to be inspected, tested, and maintained on regular intervals. The purpose of these inspections is to ensure the system will operate properly in the event of an incident, ensuring a safe environment by minimizing the risk of life and property loss.

Puget Sound Fire has contracted with BRYCER, LLC to help manage the fire protection system inspections, testing, and maintenance program. All contractors who perform inspection, testing and maintenance services of fire protection systems are required to electronically submit all compliant and non-compliant reports to the department via The Compliance Engine.

Fire Protection Systems electronically tracked by Puget Sound Fire include:

<ul style="list-style-type: none"> • Automatic Closing Fire Assemblies • Clean Agent Suppression System • Commercial Kitchen Exhaust Cleaning • Emergency Power Generator • Emergency Responder Radio Coverage System • Fire Alarm • Fire Escape 	<ul style="list-style-type: none"> • Fire Pump • Hazmat Room Ventilation Hazmat Storage Containers • Hood Suppression System • Paint/Spray Booth Suppression • Private Fire Hydrants • Smoke Control System
---	---

Contractors are required to submit test results to Puget Sound Fire on behalf of their customers.

If your fire protection system has recently been inspected, please contact your contractor and have them submit the inspection report into The Compliance Engine.

Your prompt response in scheduling an inspection for your fire protection system is appreciated.

Sincerely,

Jon Napier
Fire Marshal
